ADMINISTRATIVE OFFICES

390 Gage Avenue North, Hamilton, Ontario

TO THE SHAREHOLDERS OF BRIDGE & TANK COMPANY OF CANADA LIMITED

Dear Sir or Madam,
On behalf of the Board of Directors of Bridge & Tank Company of Canada Limited, I take pleasure in submitting herewith the audited Consolidated Balance Sheet of your Company for the year ended December 31, 1967 and the Consolidated Statements of Earnings, Earned Surplus and Source and Application of Funds for the year ending the same date.

EARNINGS

During the period the Company earned a consolidated net profit after taxes of \$327,116. The Company's operations during the period were adversely affected by the chaotic condition brought about by strikes in the construction industry, particularly during the latter half of the year. The strike by the Ironworkers Union (Steel Erectors) commenced in May and continued beyond the end of the year. This resulted in a complete cessation of field work on our largest contract, namely, Lambton Generating Station near Sarnia, Ontario. The work did not resume on the site until February 26, 1968. The adverse effect on our operations is difficult to calculate, but it is of major proportions. Other strikes in the construction industry and the retrenchment policy adopted by potential users of structural steel have also had their effect on the entire structural steel fabrication industry in Ontario.

WORKING CAPITAL

Consolidated working capital at the end of 1967 amounted to \$2,410,289. Our policy of maintaining a healthy working capital position will be continued.

HAMILTON BRIDGE DIVISION

In spite of the strikes mentioned above, the revenue from operations at the Hamilton Plant compares favourably with the previous year and we have entered 1968 with a backlog of orders amounting to \$7,240,900. This is encouraging since sales (industry-wide)

of structural steel in Ontario in 1967 are reported to be approximately 64% of the 1966 figure and the lowest in this area since 1960. The overall economic situation is also reflected in reduced volume of mechanical sales, but we are predicting improved results from our venture into production of heavy mill and industrial cranes. Our franchise to sell and produce Alliance cranes in Canada has a major potential.

RHEEM CANADA LIMITED

(50% owned)

This company with plants located in Hamilton, Edmonton and Vancouver, manufactures drums and steel shipping containers for the petroleum, food and chemical industries, transformer cases for the electrical industry and domestic water heaters. Sales and profits for 1967 were at record highs, operations are continuing to improve and equipment is being continuously up-dated. We are confident that this trend will continue.

BRIDGE & TANK WESTERN LTD.

(100% owned)

This company owns and operates a modern, medium-sized plant at North Kildonan within the boundaries of Metropolitan Winnipeg. The main products are structural steel for bridges and buildings; plate work consisting of pressure vessels, bins, tanks and other industrial equipment, and grain handling equipment. The company also operates machine shop facilities to service the mining industry. The company has had a successful year with earnings which compare favourably with the previous year. It has not, however, escaped the effects of the construction strikes in Ontario. A major part of its erection equipment which would normally have been used in conjunction with the Hamilton Bridge Division on the Lambton Generating Station has remained idle since May 1967. We are confident that in 1968 this operation will continue to improve.

VULCAN MACHINERY & EQUIPMENT LTD.

(100% owned by Bridge & Tank Western)

This company, located in Fort Garry — part of Metropolitan Winnipeg, is engaged in the sale and servicing of heavy construction equipment such as graders, front-end loaders, compactors, scrapers and other road-building equipment. Unfortunately, another loss has been suffered in spite of strenuous efforts to acquire agencies for new lines of equipment and to increase the volume of existing lines. Your management decided to make a sizeable write-down on the inventory of used equipment which has accumulated over a period of years and is determined to find a solution to this problem.

FORD-SMITH MACHINE COMPANY LIMITED

(100% owned)

FORD-SMITH COMPAGNIE LIMITEE

(100% owned)

These companies are engaged primarily in the sale of hydraulic hoists, fifth wheels and industrial grinding machines. The manufacturing is carried out in a separate building on the premises of the Hamilton Bridge Division and there are sales offices in Hamilton and in Montreal. Earnings continue to be on a modest scale and the management is giving consideration to increasing the sales volume by adding additional lines.

FORAN'S CRANE & EQUIPMENT SERVICES LTD.

(100% owned)

This company was purchased in 1966. It operates a fleet of cranes which it rents to general contractors and industrial users. Its operations are directly related to the tempo of the construction industry and it was to be expected that its earnings would be affected by the numerous strikes in the construction industry. Nevertheless, a modest profit was obtained in 1967 and with a return to stability on the labour front, increased earnings are confidently expected.

BRITISH ROPEWAY DIVISION OF BRIDGE & TANK

During 1967 the two major projects of this division were put to the test and have performed superbly. The aerial cableway installed at Expo at a cost of \$850,000 operated at its designed speed and showed it was capable of carrying even more passengers per hour than was claimed for it. The Gyrotron — the theme ride of the La Ronde amusement area — was designed by our English associates, British Ropeway Engineering Co. Ltd. — and introduced a completely new concept in sophisticated engineering for an amusement area. The intricate passenger mechanism was installed at a cost of \$800,000 and carried passengers on a simulated trip through space. These projects attracted intense interest and have placed the names Bridge & Tank and British Ropeway Engineering Co. Ltd. at the top of the list of designers and suppliers of such equipment.

GENERAL

During the year voting control of Resources Engineering of Canada Limited was sold to the engineer-shareholders of the company. Our interest in this company now consists of 250,000 non-voting preference shares with a par value of \$1.00 each of Resources Engineering of Canada Limited and \$185,000 principal amount of notes of Terra Nova Construction Company Ltd. maturing as to \$60,000 on December 31, 1968, \$75,000 on December 31, 1969 and \$50,000 on December 31, 1970. Resources Engineering of Canada Limited has guaranteed payment of these notes.

CHANGES IN PERSONNEL

In July 1967 Mr. John D. Park resigned as President and Mr. C. E. Kaddy resigned as Executive Vice-President and General Manager. In September 1967 Mr. W. B. Nicol was appointed President and General Manager of the Company. Mr. J. A. Durfey continues as Vice-President — Finance and Treasurer and Mr. V. G. Lamont as Vice-

President — Sales. In December Mr. J. A. Gairdner resigned as Chairman of the Board. He had held that position since 1954 and gave unstintingly of his time and energy. He has been succeeded by Mr. H. I. Price who formerly served as Vice-Chairman of the Board. Mr. Trumbull Warren has been appointed Vice-Chairman of the Board.

DIVIDEND POLICY

Since the consolidated earnings of the company, in spite of the hardships encountered, continue to be substantial, we propose to continue our policy of paying a double dividend payment on the Preference Shares consisting of one regular dividend plus one arrears until the entire arrears on the Preferred Stock are eliminated. By doing so, these arrears will be fully paid by March 1, 1969.

The Board wishes to express its appreciation to the officers and employees of the company for their conscientious efforts during the past year.

Submitted on behalf of the Board of Directors

W. B. Nicol, President.

cedures and such tests of accounting records and other supporting evidence as we considered necessary in the circumstances. We have relied on the reports of the auditors who have examined the financial statements of the other subsidiaries.

In our opinion, subject to the matter referred to in note 2 to the financial statements, these consolidated financial statements present fairly the financial position of the company and subsidiary

companies at December 31, 1967 and the results of their operations and the source and application of their funds for the year then ended, in accordance with generally accepted accounting principles applied on a basis consistent with that of the preceding year

Subject to the accompanying report of Peat, Marwick, Mitchell & Co., Chartered Accountants, dated February 14, 1968.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
DECEMBER 31, 1967

(1) The consolidated financial statements for 1967 include the accounts of all subsidiary companies. Investments in certain subsidiaries were disposed of during the year and the results of their operations to the effective dates of disposal are not available. Accordingly, they are not included in the consolidated statement of earnings. The 1966 figures have not been restated to exclude the accounts of these companies as the amounts involved are relatively unimportant.

(2) Recent audited financial statements of the companies whose preference shares and notes are held are not available. Consequently, the current value of the shares and the liquidity of the notes receivable at December 31, 1967 cannot be determined.

(3) Fixed assets are stated as follows:

Buildings, machinery and equipment:

On the basis of an appraisal report by Stone & Webster Engineering Corporation, dated January 29, 1954, with subsequent additions at cost, less accumulated depreciation \$2,800,628 \$3,080,552
 At cost, less accumulated depreciation \$4,053,641 2,506,126
 At values determined by the Board of Directors of a subsidiary company, as of August 31, 1955, with subsequent additions at cost, less accumulated depreciation \$83,226 48,764
\$5,635,442

Land:

On the basis of an appraisal report by Lounsbury & Lounsbury Ltd., dated January 18, 1954 \$ 142,980
 At cost 176,052
\$ 319,032

(4) The long term debt is made up as follows:

Conditional purchase contracts, lien notes and other secured notes \$ 492,565
 6% Mortgage, payments commencing in 1968 and maturing on April 1, 1969 95,000
587,565
 Less amounts due within one year, included in current liabilities 354,561
233,004

Bridge & Tank Company of Canada Limited:

5¼ % First Mortgage Sinking Fund Bonds Series A due March 1, 1974 \$2,500,000
 Less redeemed and cancelled 1,464,500 1,035,500

Bridge & Tank Western Ltd.:

5½ % Twenty-Year Sinking Fund-First Mortgage Bonds due April 1, 1973 400,000

Less redeemed and cancelled or held by parent company 350,000
50,000
 Sinking fund cash held by trustee 23,000 27,000
\$1,295,504

The trust deed securing the 5¼ % First Mortgage Sinking Fund Bonds Series A of Bridge & Tank Company of Canada Limited requires a payment in cash or in Sinking Fund Bonds to the Trustee of not less than \$143,246 on March 1, 1968. This requirement has been met at December 31, 1967 to the extent of \$138,947.

The trust deed securing the 5½ % Twenty-Year Sinking Fund First Mortgage Bonds of Bridge & Tank Western Ltd. requires a payment in cash or in Sinking Fund Bonds to the Trustee of \$20,000 on April 1, 1968.

(5) Capital Stock:

	Shares	Amount
(a)		
Authorized:		
Preference shares, par value \$50 each	192,467	\$9,623,350
Less redeemed to date	450	22,500
Authorized for issuance	192,017	\$9,600,850
Common shares of no par value	3,000,000	\$ —
Issued:		
\$2.90 Sinking Fund Preference shares	32,467	\$1,623,350
Less redeemed to date	450	22,500
Issued and outstanding	32,017	\$1,600,850
Common shares issued and outstanding	1,043,694	\$1,815,166

(b) The issued preference shares are non-participating and carry a fixed cumulative dividend of \$2.90 per share per annum. The shares are redeemable at \$51 per share.

(c) Under the terms of the sinking fund provisions in respect of the issued preference shares, the company is required to set aside cash amounting to \$22,930 on May 1, 1968 to be used for the purchase of preference shares for cancellation.

(6) Changes in the amount arising from appraisals of fixed assets are as follows:

Amount at December 31, 1966 \$1,154,887
 Deduct:
 Reduction in appreciation of fixed assets for the year ended December 31, 1967, credited to accumulated depreciation, (exclusive of depreciation of \$552,384 charged against earnings) and amounts written off in respect of disposals 56,634
Amount at December 31, 1967 \$1,098,253

- (7) Dividend arrears on the \$2.90 Sinking Fund Preference shares are \$3.62½ per share or \$116,061.
- (8) Contingent liabilities and commitments:
- (a) Notes receivable discounted with finance companies amount to \$267,300 at December 31, 1967.
 - (b) Bank loans to another company are guaranteed up to a maximum of \$100,000.
 - (c) The unfunded liability for past service costs under the companies' pension plans is approximately \$845,000 at December 31, 1967 based on actuarial studies made as at December 31, 1966. The liability of \$845,000 is being funded in the amount of \$58,333, including interest, annually to December 31, 1989.
- (9) Taxes on income are shown at the amount estimated to be payable by certain subsidiaries for the year and are after taking into consideration depreciation net of other expenses to be claimed for tax purposes in excess of the amounts charged to earnings. The accumulated tax reduction in respect of these items for all companies to the end of 1967 is \$530,150, an increase of \$65,300 for the year.
- No income taxes are payable by the other companies in the consolidation because of a loss and the loss carry-forward provisions of the relative taxing statutes. Losses carried forward against 1967 profits result in tax savings of approximately \$126,300.

Top: 'UNIVERSAL' hoists as used by the oil companies for the service station industry and the growing new car dealerships.

Left: a pedestal grinder as supplied to technical colleges and high schools.

Right: a newly designed fifth wheel with formed top plate for greater strength and safety in the trucking industry.

Back Cover: Streamlined four-seat cabin supplied by Breco Division for passenger carrying ropeways.

Trial assembly in Hamilton Plant of 150' truss, 25' deep and weighing 60 tons, for Alberta Resources Railway.
